

**Non Inflammatory Myopathies**  
Compiled by Robert Wortmann, MD 2002

1. DiMauro S, Lamperti C. Muscle glycogenesis. *Muscle Nerve* 24:984-999, 2001. Excellent review of the disorders of glycogen metabolism and glycolysis. Many of these conditions may mimic polymyositis.
2. Comi GP, Fortunato F, Lucchiari S, et al. B-enolase deficiency, a new metabolic myopathy of distal glycolysis. *Neurology* 56(suppl 3):A231-A232, 2001. Report of the most recently recognized glycogen storage disease, indicating that there are likely other previously unrecognized metabolic myopathies to be discovered in the future.
3. Miró O, Laaguno M, Masanés F, et al. Congenital and metabolic myopathies of childhood or adult onset. *Semin Arthritis Rheum* 29:335-347, 2000.
4. Nardin RA, Johns DR. Mitochondrial dysfunction and neuromuscular disease. *Muscle Nerve* 24:170-191, 2001.
5. Simon DK, Johns DR. Mitochondrial disorders: clinical and genetic features. *Annu Rev Med* 50:111-127, 1999.
6. Vladutiu GD. The molecular diagnosis of metabolic myopathies. *Neurol Clin* 18(1):53-104, 2000. Update in the genetics of this rapidly expanding field.
7. Wortmann RL. Metabolic and mitochondrial myopathies. *Curr Opin Rheumatol* 11(6):462-467, 1999.
8. Wortmann RL, Vladutiu GD. The clinical laboratory evaluation of the patient with noninflammatory myopathy. *Curr Rheumatol Reports* 3:1-7, 2001. Review of most current aspects of the evaluation of individuals with muscle myopathy.
9. Lacomis D, Zochodne DW, Bird SJ. Critical Illness Myopathy. *Muscle Nerve* 23:1785-1788, 2000. Review of recently recognized complication of systemic steroid use.
10. Stein M, Bell MJ, Ang L-C. Hydroxychloroquine neuromyotoxicity. *J Rheumatol* 27:2927-2931, 2000. Best report to appear on this toxicity.
11. Baker SK, Tarnopolsky MA. Statin myopathies: pathophysiologic and clinical perspectives. *Clin invest Med* 24:258-272, 2001. Comprehensive review of this increasingly important clinical problem.
