Cover image: The figure on the cover is a magnetic resonance image (sagittal, fat-suppressed pulse sequence) of the knee of a subject in the Multicenter Osteoarthritis Study with painful osteoarthritis. Cartilage loss (especially in the patella and trochlea), bone marrow lesions with cysts, bone attrition (trochlea), and synovitis are seen. This issue of *Arthritis & Rheumatology* features the 2019 American College of Rheumatology/Arthritis Foundation guideline for the management of osteoarthritis of the hand, hip, and knee (Kolasinski et al, pages 220–233).
