Cover image: The figure on the cover, created at the Centers for Disease Control and Prevention, depicts ultrastructural morphology exhibited by coronaviruses. Note the spikes that adorn the outer surface of the virus, which impart the look of a corona surrounding the virion, when viewed under an electron microscope. This issue of *Arthritis & Rheumatology* includes two articles related to COVID-19 and rheumatology, with many more anticipated as the world faces the pandemic that has so indelibly impacted us all.
