Special Articles

Editorial: Arthritis Gene Therapy Using Interleukin-1 Receptor Antagonist
Christopher Evans......................................................................................................................................................... 1699

New Perspectives in Rheumatology: Implications of the Cardiovascular Safety of Febuxostat and Allopurinol in Patients With Gout and Cardiovascular Morbidities Trial and the Associated Food and Drug Administration Public Safety Alert
Hyon Choi, Tuhina Neogi, Lisa Stamp, Nicola Dalbeth, and Robert Terkeltaub.............................................................. 1702

Rheumatoid Arthritis

ABT-122, a Bispecific Dual Variable Domain Immunoglobulin Targeting Tumor Necrosis Factor and Interleukin-17A, in Patients With Rheumatoid Arthritis With an Inadequate Response to Methotrexate: A Randomized, Double-Blind Study
Mark C. Genovese, Michael E. Weinblatt, Jacob A. Aelion, Heikki T. Mansikka, Paul M. Peloso, Kun Chen, Yihan Li, Ahmed A. Othman, Nasser S. Khan, and Robert J. Padley................................................................. 1710

Triple Positivity for Anti–Citrullinated Protein Autoantibodies, Rheumatoid Factor, and Anti–Carbamylated Protein Antibodies Conferring High Specificity for Rheumatoid Arthritis: Implications for Very Early Identification of At-Risk Individuals

T Cell–Dependent Affinity Maturation and Innate Immune Pathways Differentially Drive Autoreactive B Cell Responses in Rheumatoid Arthritis
Daniel R. Lu, Andrew N. McDavid, Sarah Kongpachith, Nithya Lingampalli, Jacob Glanville, Chia-Hsin Ju, Raphael Gottardo, and William H. Robinson......................................................................................................................... 1732

Role of ADAMTS-12 in Protecting Against Inflammatory Arthritis in Mice By Interacting With and Inactivating Proinflammatory Connective Tissue Growth Factor
Jian-lu Wei, Wenyu Fu, Aubryanna Hettinghouse, Wen-jun He, Kenneth E. Lipson, and Chuan-ju Liu................................................ 1745

Osteoarthritis

Disease-Modifying Osteoarthritis Treatment With Interleukin-1 Receptor Antagonist Gene Therapy in Small and Large Animal Models

Spondyloarthritis

High Rate of Drug-Free Remission After Induction Therapy With Golimumab in Early Peripheral Spondyloarthritis
Philippe Carron, Gaëlle Varkas, Thomas Renson, Roos Colman, Dirk Elewaat, and Filip Van den Bosch.......................................... 1769

Psoriatic Arthritis

Phase II Study of ABT-122, a Tumor Necrosis Factor– and Interleukin-17A–Targeted Dual Variable Domain Immunoglobulin, in Patients With Psoriatic Arthritis With an Inadequate Response to Methotrexate
Philip J. Mease, Mark C. Genovese, Michael E. Weinblatt, Paul M. Peloso, Kun Chen, Ahmed A. Othman, Yihan Li, Heikki T. Mansikka, Amit Khatri, Neil Wishart, and John Liu...................................................................................... 1778

Systemic Lupus Erythematosus

Comparison of Remission and Lupus Low Disease Activity State in Damage Prevention in a United States Systemic Lupus Erythematosus Cohort
Michelle Petri and Laurence S. Magder........................................................................................................................................ 1790
Brief Report: Risk of Childhood Rheumatic and Nonrheumatic Autoimmune Diseases in Children Born to Women With Systemic Lupus Erythematosus

Julie Couture, Sasha Bernatsky, Susan Scott, Christian A. Pineau, and Evelyne Vinet

1796

Brief Report: Tubulointerstitial Damage in Lupus Nephritis: A Comparison of the Factors Associated With Tubulointerstitial Inflammation and Renal Scarring

Alejandra Londoño Jimenez, Wenzhu B. Mowrey, Chaim Putterman, Jill Buyon, Beatrice Goilav, and Anna Broder

1801

Inhibition of Cyclic GMP-AMP Synthase Using a Novel Antimalarial Drug Derivative in Trex1-Deficient Mice

Jie An, Joshua J. Woodward, Weinan Lai, Mark Minie, Xizhang Sun, Lena Tanaka, Jessica M. Snyder, Tomikazu Sasaki, and Keith B. Elkon

1807

Clinical Image
Osteosclerotic Bone Lesions of the Skull
Savvas Psarelis, Ismini Panayotidis, and Elena Nikipherou

1819

Systemic Sclerosis
Treatment Algorithms for Systemic Sclerosis According to Experts
Andreu Fernández-Codina, Kyle M. Walker, and Janet E. Pope, on behalf of the Scleroderma Algorithm Group

1820

Brief Report: Smoking in Systemic Sclerosis: A Longitudinal European Scleroderma Trials and Research Group Study

1829

Lyme Disease
Correlation of Lyme Disease–Associated IgG4 Autoantibodies With Synovial Pathology in Antibiotic-Refractory Lyme Arthritis
Katherine B. Sulka, Klemen Strle, Jameson T. Crowley, Robert B. Lochhead, Robert Anthony, and Allen C. Steere

1835

Gout
Brief Report: Monosodium Urate Monohydrate Crystal Deposits Are Common in Asymptomatic Sons of Patients With Gout: The Sons of Gout Study
Abhishek Abhishek, Philip Courtney, Wendy Jenkins, Gabriela Sandoval-Plata, Adrian C. Jones, Weiya Zhang, and Michael Doherty

1847

IgG4-Related Disease
Aberrant Expansion and Function of Follicular Helper T Cell Subsets in IgG4-Related Disease
Yu Chen, Wei Lin, Hongxian Yang, Mu Wang, Panpan Zhang, Ruie Feng, Hua Chen, Linyi Peng, Xuan Zhang, Yan Zhao, Xiaofeng Zeng, Fengchun Zhang, Wen Zhang, and Peter E. Lipsky

1853

Autoimmunity
The Lupus-Associated Fcγ Receptor IIb–I232T Polymorphism Results in Impairment in the Negative Selection of Low-Affinity Germinal Center B Cells via a-Ab in Mice
Jyun-Pei Jhou, I-Shing Yu, Haw Hwai, Chih-Shan Chen, Pei-Lung Chen, and Shiang-Jong Tzeng

1866

Sphingosine 1-Phosphate Receptor 1 Signaling Maintains Endothelial Cell Barrier Function and Protects Against Immune Complex–Induced Vascular Injury
Nathalie Burg, Steven Swendeman, Stefan Worgall, Timothy Hla, and Jane E. Salmon

1879

1892
Cover image: The figure on the cover (from Burg et al, page 1879) shows immunofluorescence staining of human umbilical vein endothelial cells treated with immune complex–activated polymorphonuclear neutrophils and stained for VE-cadherin (green), phosphorylated myosin light chain (red), and nuclei (blue). Markedly decreased VE-cadherin and increased phosphorylated myosin light chain, both consistent with endothelial cell dysfunction, are observed when compared to human umbilical vein endothelial cells treated with unstimulated neutrophils. These findings were mitigated by sphingosine 1-phosphate receptor 1 agonists.
