Cover image: The figure on the cover (from Bell et al, pages 1447–1455) shows the hand of a healthy subject (images on top) and the hand of a patient with rheumatoid arthritis (images on bottom), at the time of (images on left) and ~7 days after (images on right) intradermal web space injection of indocyanine green dye. Near-infrared imaging demonstrates reduced lymphatic clearance of dye in the hand of the patient with rheumatoid arthritis.
