Scleroderma, Myositis and Sjögren's Syndrome

At the completion of this module the participant should be able to:

1. Define and differentiate Scleroderma and Inflammatory Myopathy.
2. Describe the epidemiology and pathogenesis of:
   - Scleroderma and Inflammatory Myopathy.
3. Describe the clinical course, prognosis and risk factors for:
   - Scleroderma and Inflammatory Myopathy.
4. Describe the differential diagnosis for:
   - Scleroderma and Inflammatory Myopathy.
5. Describe the clinical features of:
   - Scleroderma and Inflammatory Myopathy.
6. Discuss major complications of:
   - Scleroderma and Inflammatory Myopathy.
7. Discuss the treatment of:
   - Scleroderma and Inflammatory Myopathy.
8. Discuss future directions in assessing and managing immune-mediated disorders.

Sjögrens Syndrome

At the completion of this module the participant should be able to:

1. Define Sjögrens.
2. Describe the epidemiology and pathogenesis of Sjögrens.
3. Describe the clinical course, prognosis and risk factors for Sjögrens.
4. Describe the differential diagnosis for Sjögrens.
5. Describe the clinical features of Sjögrens.
6. Discuss the major complications of Sjögrens.
7. Discuss the treatment for Sjögrens.
8. Discuss future directions in assessing and managing Sjögrens.
