The Honorable Governor Ralph Northam  
Office of the Governor  
P.O. Box 1475  
Richmond, VA 23218

Subject: Please sign House Bill 2126

Dear Governor Northam:

We, the undersigned organizations of Fair Health Care VA, respectfully request that you sign House Bill 2126, legislation that will improve patient access to needed treatment and protect patients from the unintended consequences of step therapy that can cause harm. The Fair Health Care VA coalition is comprised of leading patient and provider advocacy organizations and collectively represents the many voices of adults, children and families coping with serious and chronic illnesses in the Commonwealth alongside their care team.

Step therapy is used by health insurers to help contain rising healthcare costs. Sometimes called “fail first”, step therapy protocols require patients to try and fail another lower cost treatment before they can receive the medication originally prescribed by their doctor. When step therapy requirements are applied bluntly through broad utilization management practices, patients often are prevented from having access to the specific medications, diagnostic tests or other therapies determined the best choice for them in close consultation with their doctor. This can interfere with timely and effective treatment of their condition, putting patients’ health and well-being at risk.

As a doctor, you understand that prescribed treatments should be the result of shared decision-making between patients and their clinicians based on conversations they’ve had about what best meets the patient’s particular needs and circumstances. While step therapy may reduce health care costs, it’s imperative to apply these policies in a way that improves quality care delivery rather than impedes it.

HB 2126 balances cost containment objectives with meeting Virginians’ health care needs by ensuring step therapy protocols are transparent, understandable and allow flexibility for considering medical provider judgement and expertise as well as the impact on patients. The legislation is not an outright ban on step therapy; instead, it inserts protections that establish a consistent and transparent process for patients and their doctors to request exceptions to the imposition of step therapy protocols. We are pleased that the General Assembly passed this important legislation and we urge you to sign it into law.

If you should have any questions about the bill or our coalition, please contact Donna Guinn, Director of Grassroots Advocacy for National Patient Advocate Foundation at donnag.kaufman@npaf.org or 703-489-2727.

Respectfully submitted,
Fair Health Care VA Coalition
