Pediatric Rheumatology Entrustable Professional Activities (EPA)

Approved by the American Board of Pediatrics

EPAs that cross the generalist to subspecialist role

- Apply public health principles and improvement methodology to improve care for populations, communities, and systems
- Provide for and obtain consultation from other health care providers caring for children
- Contribute to the fiscally sound and ethical management of a practice (e.g., through billing, scheduling, coding, and record keeping practices).
- Facilitate handovers to another healthcare provider including transition to an adult healthcare provider
- Lead and work within interprofessional health care teams

EPAs that are common to all subspecialties

- Engage in scholarly activities through the discovery, application, and dissemination of new knowledge (broadly defined)
- Lead within the subspecialty profession

Subspecialty specific EPAs

- Manage patients with acute or chronic complex multi-system rheumatic disease in an ambulatory, emergency, or inpatient setting
- Provide or coordinate a medical home for patients with complex and chronic rheumatic disease
- Demonstrate competence in the utilization of immunomodulatory therapy
