

Electronic Health Record (EHR) Compatible Systems

FIGMD is the technical partner of the American College of Rheumatology’s RISE Registry whose platform integrates with and extracts data from the provider’s electronic health record systems (EHR). After integration of your EHR system is complete, the registry will extract your practice's data, simplifying your efforts for reporting and benchmarking your Merit-Based Incentive Payment System (MIPS) for CMS submissions.

The below list is comprised of nearly 200 EHR systems used by rheumatology practices that have successfully integrated with the RISE registry. Find your registry and contact us today at RISE@rheumatology.org.
