of RHEUMATOLOGY  
*Empowering Rheumatology Professionals*

## RIGHT TO VOTE

The right to vote is at the foundation of representative democracy.

The American College of Rheumatology (ACR) condemns provisions in voter laws that would make it more difficult for communities of color, and individuals with rheumatic diseases, disabilities, other chronic health conditions, to exercise their constitutional right to vote. The ACR urges our elected officials to come together and correct inequities in the voting system that exist today while also securing the franchise for future generations.
